

Hyatt Regency Crystal City Hotel at Reagan National Airport

VILLAGE STYROFOAM DISPLAY CARVING WORKSHOP

Workshop by
Georgian Bay Villagers

\$55 per person

LIMIT 25/CLASS

Wednesday, August 16
8am – 10am

One of the biggest joys of collecting is displaying. No matter what Christmas treasure you collect, it's still about how you display them. In this workshop, you will get hands-on experience with Hot Wire Foam Factory tools. Hot Wire Foam Factory hot knives are the top tool by crafters and the favorite of the village collecting community.

The National Council of 56 Club members collect Department 56 villages. One of our member clubs, the Georgian Bay Villagers, will be hosting this workshop. Every member of the club is a talented display craftsman and will share their skills from basic cutting to carving cobblestone and bricks; those attending will learn a lot about how a hotwire knife works.

You will carve a small display that will be perfect for a single full-size house, a small village of mini houses, or your favorite Christmas collectible.

GEORGIAN BAY VILLAGERS, INSTRUCTORS

Did we mention that along with the display you will be leaving with one of the amazing Hot Wire Foam Factory Tools? The display will include trees as well as the styrofoam base.
